Place: Lucknow-India

Enthusiastic **Full Stack Developer** with a passion for crafting captivating user experiences. Proficient in frontend technologies including HTML, CSS, **React.js**, and **TailwindCSS**. Skilled in backend development using **Node.js**, **Next.js**, **Express.js**, **MongoDB**, and JavaScript ensuring seamless integration and robust functionality. Strong foundation in **Java**, **OOP principles**, and **algorithms**, driving efficient and scalable solutions. Eager to contribute to dynamic projects and continually expand expertise in the ever-evolving landscape of software development.

Project Details

Homestay Website

Techstack: **React.js**, **Tailwind**, **Node.js**, **Git**, **VS-code**

Developed a responsive homestay website using React, CSS, JavaScript, and Git. The project includes multiple dynamic components and sliding image cards to enhance user interaction and visual appeal.

Portfolio Website (Deployed)

Techstack: **React.js**, **Bootstrap**, **Vercel**, **Git**, **Javascript**

This is my portfolio website to design the frontend I have used Html, CSS and Bootstrap and for backend I have use Javascript. To integrate form I have used Formspre api to get form details to my mail.

BHU Placement Website ((Deployed)

Techstack: **Javascript**, **React.js**, **Nodejs**, **Expressjs**, **MongoDB**, **RestApi**, **Git** & **Github**

This website is currently under development for the placement cell of Banaras Hindu University, Asia's largest residential university. I have designed the entire frontend from scratch and implemented the backend, including REST APIs, database management, authentication, and routing. This platform is projected to serve approximately 25,000 students.
